Role :Full Stack Developer
GitHub Link : <https://github.com/AshokReddyGodi/Web-Application-Online-Election-Voting>

Description : The aim of this project is to provide an opportunity to vote online without the need of any paperwork.

Functionality:-

This application has two modules Admin and Voter Module.

Admin Module: Admin can Login using his Username and Password. Admin can add/delete/update nominees. Admin can view the Nominees list and approve for participating in the election. Admin can also view and display the results. Admin can view the voters list as well.

Voter: Voters have to register themselves to vote. They could login and cast their choosing from the list of Nominees Competing in the election.

Project Title 2 : ATM Management System
Technologies : Java , JDBC, Oracle 12C
Role : Full stack Developer
GitHub Link : <https://github.com/AshokReddyGodi/Desktop-Application>

Description : This desktop application system is to provide a system for customers to process regular transactions like cash deposits, cash withdrawals, balance enquiry, transfer fund between savings account and also to change PIN Number.

This project is aimed at any customer who has a savings account. Each customer has a customer number and a Personal Identification Number (PIN) Both must be typed into the simulation to gain access to the accounts. Once they have gained access, the Account balance of the selected account is displayed (initially zero). Then the customers can deposit and withdraw money. The balance will be updated accordingly.

Project Title 3 Mobile Controlled Robot using DTMF Technology and with fire sensor.

Technologies DTMF technology.

Role Developed code & assembled the Kit

Description This project is aimed to control robot motion through mobile phone using DTMF technology. In order to control the robot, a call is to be made to the cell phone attached to the robot from remote mobile. Now the call is being established between the mobiles by pressing the answer button. Now we can control the movement of the robot by using the dial pad keys 1,2,3,4, & 5 numbers on your mobile. The robot can be used for surveillance.
